

JUMMA MOHAMMAD TELI

Data Analyst | Power BI · SQL · Python · Tableau · ETL · Data Modelling · Machine Learning · Cloud Analytics

Birmingham, UK | jummamohammad477@gmail.com | +44 7442 001088 | [linkedin.com/in/jumma-mohammad](https://www.linkedin.com/in/jumma-mohammad) | github.com/jumma786

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 5+ years' experience across financial services, telecom, and public-sector environments, turning complex datasets into actionable business intelligence. Skilled in end-to-end analytics — from data extraction, cleansing, transformation, and data modelling to interactive dashboards, ad-hoc analysis, and stakeholder reporting — with a proven record of improving reporting efficiency by 30%, cutting manual processing by 40%, and delivering data-driven insights that directly influenced strategic decisions. Proficient in Power BI (DAX, Power Query), SQL (T-SQL, CTEs, window functions), Python (Pandas, Scikit-learn), Tableau, and ETL/ELT tools (Talend, SSIS). Experienced in data warehousing, star/snowflake schema design, data governance, Agile/Scrum delivery, and translating business requirements into scalable analytical solutions. Complemented by a 10-project MLOps portfolio (FastAPI, Docker, MLflow, Airflow, Kubernetes) with 132 passing tests on real-world datasets. MSc Computer Science (Queen Mary University of London), IBM-certified in Data Analytics and Visualisation. Currently delivering enterprise analytics for UBS within financial services.

CORE SKILLS

- Power BI (DAX, Power Query, Row-Level Security, Dashboards)
- Python (Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib)
- ETL/ELT Pipelines (Talend Open Studio, SSIS, Python)
- Statistical Analysis, A/B Testing, Regression & Forecasting
- MLOps: MLflow, DVC, Optuna, Airflow, Docker
- Cloud: AWS (S3, Redshift, Lambda), Google Cloud, Databricks
- Excel (Advanced): Pivot Tables, VBA, VLOOKUP, Power Pivot
- Agile/Scrum, JIRA, Confluence, Sprint Planning
- Data Cleaning: OpenRefine, Python (regex, fuzzywuzzy)
- Automation: UiPath RPA, Python Scripting, Scheduled Jobs
- SQL: Complex Queries, CTEs, Window Functions, Stored Procedures
- Data Modelling, Star/Snowflake Schemas, Data Warehousing
- Tableau, Cognos, SSRS — KPI Reporting & Visualisation
- Data Governance, Validation, Lineage & Quality Assurance
- Model Serving: FastAPI, Kubernetes, Helm, Prometheus
- Version Control: Git, GitHub, GitHub Actions CI/CD
- Stakeholder Engagement, Requirements Gathering & UAT
- Database: SQL Server, PostgreSQL, MySQL, T-SQL, SSMS
- NLP, Sentiment Analysis, Text Mining, UMAP, Clustering
- Business Analysis, KPI Design, Ad-hoc Reporting, SLA Tracking

WORK EXPERIENCE

Data Analyst (Contract, Remote) | UBS

Oct 2024 – Present

- Deliver enterprise analytics across large-scale financial, operational, and risk datasets, supporting regulatory reporting and strategic decision-making for multiple business units.
- Develop and optimise 50+ complex SQL queries, views, stored procedures, and analytical datasets powering regulatory reporting, KPI measurement, and forecasting across business functions.
- Build interactive Power BI and Tableau dashboards used by 20+ stakeholders, providing real-time visibility into financial performance, operational metrics, and business KPIs.
- Automate recurring reporting and data extraction workflows using SQL and Python, saving ~8 hours/week of manual effort while improving accuracy and consistency.
- Collaborate with cross-functional teams including risk, compliance, and finance to translate business requirements into technical specifications and analytical solutions.
- Perform data profiling, cleansing, and validation on datasets with millions of records, ensuring data integrity for downstream consumption and audit readiness.
- Design and maintain data documentation, data dictionaries, and lineage maps to support governance and knowledge transfer across teams.

Data Analyst | IT Skills, London, UK

Oct 2023 – Oct 2024

- Built and maintained interactive Power BI dashboards visualising KPIs across departments, increasing reporting efficiency by 30% and enabling faster executive decision-making.
- Wrote and optimised complex SQL queries for validation, cleansing, and extraction across large datasets, ensuring 99%+ accuracy for downstream reporting.
- Automated ETL workflows in Talend Open Studio, reducing manual processing time by 40% and improving report delivery timeliness by 20%.
- Integrated multiple online and offline sources into a unified data warehouse to improve reporting reliability and cross-team accessibility.
- Conducted root-cause analysis on data discrepancies and presented findings to senior management with actionable recommendations.
- Created scheduled reports and email subscriptions in Power BI Service, streamlining report distribution to 50+ end users across the organisation.

Data Analyst | Skyway Internet Services, Nagaur, India

Apr 2019 – Jul 2023

- Analysed large operational datasets using SQL and statistical techniques, surfacing performance trends that drove measurable business improvements.
- Built predictive models to forecast customer churn and key business metrics, enabling evidence-based resource allocation and strategic planning.

- Developed Power BI and Tableau dashboards communicating KPIs to non-technical stakeholders, improving data literacy and reducing ad-hoc reporting requests by 35%.
- Implemented automated data validation and quality checks, rapidly resolving discrepancies to strengthen dataset reliability.
- Designed and maintained SQL-based data pipelines processing 100K+ daily records, ensuring timely data availability for business reporting.
- Conducted exploratory data analysis and customer segmentation (RFM) to identify high-value accounts and inform targeted retention campaigns.
- Mentored junior analysts on SQL best practices, Power BI report design, and data quality standards.

IT Technician | BSF (Border Security Force), Delhi, India

Apr 2016 – Jan 2019

- Operated and maintained secure communication systems, ensuring reliable transmission of sensitive operational data across multiple units.
- Implemented data backup and security procedures, maintaining detailed transmission logs to safeguard critical information assets.
- Provided IT support and trained 30+ staff on new systems and protocols, improving operational efficiency across the unit.
- Managed inventory tracking and equipment logs using spreadsheets and internal databases, ensuring accurate asset records.

KEY PROJECTS

End-to-End MLOps Portfolio — 10 Projects · MLflow · FastAPI · Docker · Airflow · Kubernetes · DVC · Optuna

Built a 10-project production MLOps portfolio covering the full ML lifecycle: multi-model tournament, scheduled retraining (DVC), feature engineering, hyperparameter tuning (Optuna), FastAPI + Docker serving, feature store, drift detection (PSI/KS-test), A/B testing, Airflow orchestration, and a Kubernetes platform. 132 passing tests across all projects on real UCI datasets (Bank Marketing 41K rows, Online Retail II 1M+ rows).

GitHub: github.com/jumma786 (mlops-model-tournament, mlops-model-serving, mlops-k8s-platform + 7 more)

Hospital Analytics End-to-End · T-SQL · Power BI · XGBoost · SHAP

Full pipeline on synthetic EHR data: T-SQL on SQL Server, 3-page Power BI dashboard (star schema, DAX), and an XGBoost readmission model achieving AUC 0.907 with SHAP explainability. Also deployed a live readmission risk prediction API via FastAPI on Render.

GitHub: [hospital-analytics-end-to-end](#) · [hospital-readmission-api](#)

UK Data Analyst Job Market NLP Analysis · NLP · UMAP · HDBSCAN · XGBoost

Analysed 3,653 UK job postings using sentence-transformer embeddings, clustering them into 17 role archetypes via UMAP/HDBSCAN. Built an XGBoost salary model ($R^2=0.51$) revealing that real salaries are more predictable than platform-predicted ones.

GitHub: [uk-data-analyst-job-market-nlp](#)

UK Online Retail Analytics & Churn · Python · SQL Server · Power BI · XGBoost

End-to-end analysis of 1.07M UK retail transactions: SQL Server RFM segmentation, 4-page Power BI dashboard, and an XGBoost churn model identifying £1.26M revenue exposure in top 100 at-risk customers using leakage-safe time-based features.

GitHub: [online-retail-analytics](#)

Portfolio Risk Analyser · Python · Flask · yfinance · Render

Built a portfolio risk and concentration analyser computing sector exposure, volatility, correlation matrices, and maximum drawdown. Deployed as a live Flask web app on Render for interactive portfolio assessment.

GitHub: [portfolio-risk-analyser](#) · [portfolio-risk-web](#)

PySpark Sales Analysis · PySpark · Databricks · pytest · CI/CD

Restructured a Databricks notebook into a production Python package (11 modules) with a 24-test pytest suite, GitHub Actions CI, and a full quality gate (ruff, mypy). Demonstrates data engineering and software-engineering rigour at scale.

GitHub: [pyspark-sales-analysis](#)

Airline Operations Analytics · Python · SQL Server · Power BI · Star Schema

Data quality audit and rebuild on 495K BTS flight records: Python ETL into a SQL Server star schema, with Power BI dashboards reporting DOT-standard metrics including on-time performance, delay causes, and route efficiency.

GitHub: [airline-operations-analytics](#)

Investment Company Analysis · Python · SQL Server · Power BI

End-to-end analytics on U.S. investment fund industry trends (2010–2026): Python data processing, SQL Server modelling, and Power BI dashboards visualising fund performance, AUM distribution, and sector allocation patterns.

GitHub: [investment-company-analysis](#)

UK Energy Demand Forecasting · XGBoost · FastAPI · Streamlit · CI/CD

End-to-end ML pipeline forecasting UK electricity demand with XGBoost. Includes a FastAPI service, tested codebase with CI, and a live Streamlit dashboard for interactive demand exploration.

GitHub: [uk-energy-forecasting](#)

EDUCATION

MSc Computer Science (IoT & Future Networks)

Queen Mary University of London, UK
Sep 2023 – Sep 2024

BSc Information Technology

Sabarmati University, Gujarat, India
Sep 2012 – Jun 2015

CERTIFICATIONS

- Introduction to Data Analytics — IBM
- Data Visualization & Dashboards (Excel & Cognos) — IBM
- UiPath Automation Implementation Fundamentals — UiPath
